

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

Build empathy

The information you add here should be representative of the observations and research you've done about your users.

Says

What have we heard them say?
What can we magine them saying?

This project
helps to
understand the
population
growth in
multiple ways

Poverty and

economic

growth is

increasing

Highly competitive world

death rate

Increase in birth rate also increases in

Getting
upset about
the future
generation

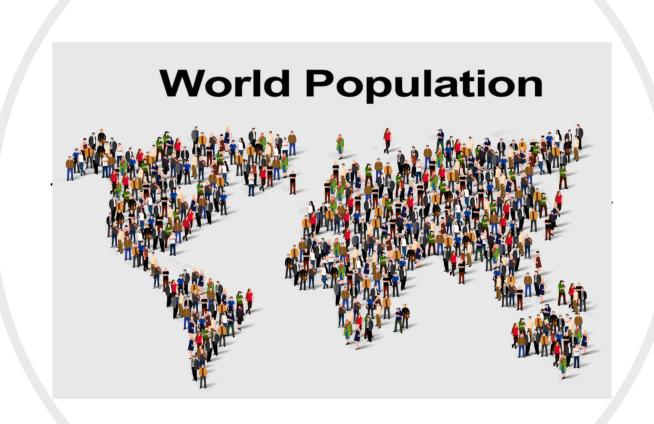

Disturbed about the ecological degradation

Thinks

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

Annoyed, as the political voice is unarisied

The population forecasting analysis brings benefit to the people as it helps to know the changes in the growth of the country

While tracing the population growth people knows the ways to solve the demographic changes

Developing the agriculture and industrial

activities

Encouraging the urbanisation

Upgrading the infrastructure and strategies

Gets fulfilment in the examination of growth of global community

Also better steps
should be taken to
improve the economic
growth, job
opportunities,poverty
by realizing the
population growth

Recognized the demographic changes and data analyzation of population growth

Realized the procedure to overcome the population growth

Feels

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?

Does

What behavior have we observed? What can we imagine them doing?
